For the first time, all of the flamenco palos (forms) are analysed from a strictly rhythmic and musical perspective. It is the first complete method that includes cajón (box-drum) and tinaja. It also includes several ideas for congas, bongos, bata drums and drums. All of the basic forms of hand clapping for bulerías, tangos, soleás, rumbas tanguillos, fandangos, guajiras, etc., are covered. You don't have to read music to follow it, as all the exercises and rhythms are on the CD.
